VOLUME 26

LIST OF CONTENTS

Number 1

L. A. HOKE, P. W. LAVORI and J. C. PERRY — 1 — Mood and global functioning in borderline personality disorder: individual regression models for longitudinal measurements

P. S. WOLYNIEC, A. E. PULVER, J. A. MCGRATH and D. TAM — 17 — Schizophrenia: gender and familial risk

M. W. OTTO, M. H. POLLACK, G. S. SACHS, C. A. O'NEIL and J. F. ROSENBAUM — 29 — Alcohol dependence in panic disorder patients

N. LOIMER, P. HOFMANN and H. R. CHAUDHRY — 39 — Nasal administration of naloxone for detection of opiate dependence

S. MANNUZZA, A. J. FYER, J. ENDICOTT, M. S. GALLOPS, L. Y. MARTIN, T. REICH and D. F. KLEIN — 45 — An extension of the acquaintanceship procedure in family studies of mental disorder

R. G. MALGADY, L. H. ROGLER and W. W. TRYON — 59 — Issues of validity in the diagnostic interview schedule

P. HANNAH, D. ADAMS, V. GLOVER and M. SANDLER — 69 — Abnormal platelet 5-hydroxytryptamine uptake and imipramine binding in postnatal dysphoria

R. S. GRIFFITHS, K. O. CHUNG-A-ON, K. D. GRIFFITHS, J. W. PAYNE and J. I. DAVIES — 77 — The sequestration of [^{3}H]spiperone by lymphocytes in schizophrenics and their first-degree relatives: a limited vulnerability marker?

H. P. ERDMAN, M. H. KLEIN, J. H. GREIST, S. S. SKARE, J. J. HUSTED, L. N. ROBINS, J. E. HELZER, E. GOLDRING, M. HAMBURGER and J. P. MILLER — 85 — A comparison of two computer-administered versions of the NIMH diagnostic interview schedule

I — Software Survey Section

Number 2

N. LOIMER, P. HOFMANN and H. R. CHAUDHRY — 97 — Midazolam shortens seizure duration following electroconvulsive therapy

R. G. KATHOL, T. L. GEHRIS, B. T. CARROLL, S. D. SAMUELSON, A. F. PITTS, W. H. MELLER and J. L. CARTER — 103 — Blunted ACTH response to hypoglycemic stress in depressed patients but not in patients with schizophrenia

M. Banger, O. Benkert, J. Röschke, T. Herth M. Hebenstreit, M. Philipp and J. B. Aldenhoff — 117 Nimodipine in acute alcohol withdrawal state

M. Maes, M. Van der Planken, W. J. Stevens, D. Peeters, L. S. DeClerck, C. H. Bridts, C. Schotte and P. Cosyns — 125 Leukocytosis, monocytosis and neutrophilia: hallmarks of severe depression

T. A. Kosten, S. F. Anton and B. J. Rounsaville — 135 Ascertaining psychiatric diagnoses with the family history method in a substance abuse population

D. R. Jones and M. B. Jones — 149 Behavioral contagion in sibships

165 Books Received

167 Announcement

I Software Survey Section

Number 3

J. S. Kline, J. E. Smith and H. C. Ellis — 169 Paranoid and nonparanoid schizophrenic processing of facially displayed affect

M. Maes, L. Maes, C. Schotte and P. Cosyns — 183 A clinical and biological validation of the DSM-III melancholia diagnosis in men: results of pattern recognition methods

S. L. Brown, D. M. Svrakic, T. R. Przybeck and C. R. Cloninger — 197 The relationship of personality to mood and anxiety states: a dimensional approach

M. W. Dysken, M. D. Minichiello, J. L. Hill, S. Skare, J. T. Little, S. E. Molchan and T. Sunderland — 213 Distribution of peripheral lymphocytes in Alzheimer patients and controls

219 Books Received

Number 4

GENETICS AND GENE EXPRESSION IN MENTAL ILLNESS

	ii	Announcement of new Editors-in-Chief
N. Erlenmeyer-Kimling, G. L. Cantoni and S. S. Kety	221	Foreword
Section I. Concepts, classification and genetics of mental illness		
R. M. Murray, P. Jones, E. O'Callaghan, N. Takei and P. Sham	225	Genes, viruses and neurodevelopmental schizophrenia
E. Strömgren	237	The concept of schizophrenia: the conflict between nosological and symptomatological aspects
S. S. Kety and L. J. Ingraham	247	Genetic transmission and improved diagnosis of schizophrenia from pedigrees of adoptees
G. B. Cassano, H. S. Akiskal, G. Perugi, L. Musetti and M. Savino	257	The importance of measures of affective temperaments in genetic studies of mood disorders
Section II. Putative biochemical and biological markers		
E. Gandini	271	Genetics of affective disorders
V. Andreoli	279	The complexity of psychiatric nosography and the "simplicity" of molecular genetics
Section III. Newer molecular genetic strategies		
P. F. Pignatti and A. E. Turco	287	Tracking disease genes by reverse genetics
S. H. Barondes	299	How genetically heterogeneous are the major psychiatric disorders?
E. I. Ginns, J. A. Egeland, C. R. Allen, D. L. Pauls, K. Falls, T. P. Keith and S. M. Paul	305	Update on the search for DNA markers linked to manic–depressive illness in the Old Order Amish
T. C. Gilliam	309	Mapping psychiatric disease genes: impact of new molecular strategies

Section IV. Behavioral traits: potential use in linkage studies

S. MATTHYSSE and J. PARNAS — 329 — Extending the phenotype of schizophrenia: implications for linkage analysis

J. FELDON and I. WEINER — 345 — From an animal model of an attentional deficit towards new insights into the pathophysiology of schizophrenia

A. OLIVERIO, S. CABIB and S. PUGLISI-ALLEGRA — 367 — Nonhuman behavioral models in the genetics of disturbed behavior

A. F. MIRSKY, S. J. LOCHHEAD, B. P. JONES, S. KUGELMASS, D. WALSH and K. S. KENDLER — 383 — On familial factors in the attentional deficit in schizophrenia: a review and report of two new subject samples

L. ERLENMEYER-KIMLING and B. A. CORNBLATT — 405 — A summary of attentional findings in the New York High-Risk Project

P. S. HOLZMAN — 427 — Behavioral markers of schizophrenia useful for genetic studies

Section V. Epilogue

E. COSTA — 449 — Building a bridge between neurobiology and mental illness

S. MATTHYSSE, D. L. LEVY, D. KINNEY, C. DEUTSCH, C. LAJONCHERE, D. YURGELUN-TODD, B. WOODS and P. S. HOLZMAN — 461 — Gene expression in mental illness: a navigation chart to future progress
